

Seeking Paid Interns

THE BUCK INSTITUTE

conducts research to combat diseases of aging, such as Alzheimer's, Parkinson's, cancer, macular degeneration, heart disease and diabetes. It is seeking interns from COM for Spring 2024 to support research efforts and Environmental Health & Safety. Through hands-on training, student interns will develop critical thinking, laboratory, and communication skills.

Join us to learn more about this amazing opportunity, receive application advice from Buck scientists, and enjoy lunch.
