

## Environmental Health & Safety (EHS) Intern

### POSITION SUMMARY

The EHS Intern will help complete several projects to improve safety while gaining access to the many educational opportunities on the biology of aging offered to Buck staff.

### LEARNING OBJECTIVE

1. Develop skills in creating engaging educational materials.
2. Increase knowledge of the biology of aging.
3. Learn how EHS/Compliance supports laboratory work.

### ADDITIONAL INFORMATION

- Spring 2023
- Part-time position (approximately 10 hours per week)
- \$1,500 per term

### KEY RESPONSIBILITIES & PROJECTS

- Prepare educational materials. Depending on Intern's skill set, projects may include:
  - Creating a comedic musical video on safety issues
  - Writing short articles on specific safety topics
  - Creating slides to illustrate good safety practices
  - Updating and improving content on EHS intranet
  - Creating signage to support laboratory and building safety.
- Some routine administrative work
- Inspect safety equipment including AED, first aid kits, spill kits, etc.

### QUALIFICATIONS

- Working towards AA/BA/BS degree, preferably in science or engineering
- Confident learner eager to develop new skills
- Successful completion of at least one college-level chemistry class
- Interest in effective training, safety, compliance, and biology
- Strong attention to detail, good judgment, and self-confidence
- Proficient in MS Office, e-mail, and Internet functions

### ABOUT US

Our success will ultimately change healthcare. At the Buck, we aim to end the threat of age-related diseases for this and future generations by bringing together the most capable and passionate scientists from a broad range of disciplines to identify and impede the ways in which we age. We are an independent, non-profit institution located in Marin County, CA, with the goal of increasing human healthspan, or the healthy years of life. Globally recognized as the pioneer and leader in efforts to target aging—the number one risk factor for diseases including Alzheimer's, Parkinson's, cancer, macular degeneration, heart disease, and diabetes—the Buck seeks to help people live better longer.

We are an equal opportunity employer and strive to create an atmosphere where diversity of identity, experience, and background are welcomed, valued, and supported. Candidates who contribute to this diversity are strongly encouraged to apply.

**TO APPLY**
